

100 % Recyclable

# **Product Catalogue**

# Use the film the professionals use

Complete protection solutions for work & paint shops 100 % Made in Germany

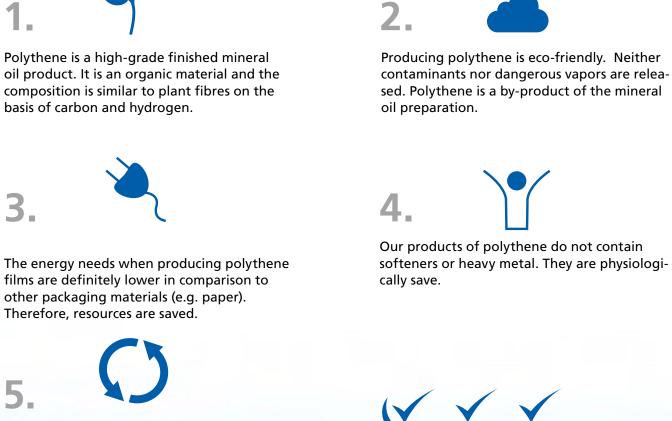

#### THE BOTTON OF

# We are your Manufacturer.

# Certified Quality.

# Protection Films for the ecology-minded Customer Service

# Arguments for the ecologically beneficial raw material polythene:

Polythenes are usable several times due to their high ultimate strength and wet strength. Therefore, they are eco-friendly.

# Eco-friendly and easy to dispose:

Polythene films are ground water neutral

The films can be used to create energy or can be recycled and reused.

Horn & Bauer only uses antipollution, heavy metal free polythene mixtures for the production of their protective films.

# **Our environmentally friendly solutions**

# Recycling

Collection, homogeneous separation and reuse of plastic waste enables us to produce recycled products that give a second life. Waste that never reaches the oceans does not pose a threat to sensitive ecosystems.

## Low energy demand

Compared to other packaging materials (e.g. paper), the energy required for the production of polyethylene films is significantly lower and resources are conserved.

# **Organic material**

Polyethylene is a highly refined petroleum product. It is an organic material, similar in structure to plant fibres based on carbon and hydrogen.

# Physiologically save

Our polyethylene products contain neither plasticizers nor heavy metals.

## Homemade energy

With our combined heat and power plant we cover 25% of our own energy requirements.

Protect GREEN

# SMART GRIP – Extra non-slip seat protection Less material – more protection

#### **Easy on resources**

Conservation of resources due to lower material usage with higher product protection.

#### Extra non-slip

Prevents slipping on the surface to be protected. Offers perfect and safe protection.

## Reusable

The material properties allow multiple use of the product.

# The green one – **K** seat protection recycled material

## Recycling

Manufacture from more than 50 % recycled material.

# Reusable

The material properties allow multiple use of the product.

# Integral Recycle – Set Lösung aus recyceltem Material

# Extra non-slip

Prevents slipping on the surface to be protected. Offers perfect and safe protection.

# Recycling

Manufacture from more than 50 % recycled material.

# Reusable

The material properties allow multiple use of the product.

# Bio Protect – Seat protector made of biological degradable material

#### **Biodegradable Material**

Made of 100% biodegradable material. Certified according to the European standard EN 13 432.

## Reusable

The material properties allow multiple use of the product.

Our management: Jörg Horn, Dominikus Pohl, Julia Pohl and Björn Bauer

We are a **family-run** business.

Horn & Bauer is a leading specialist in the **production and finishing** of plastic films for functional **protection and packaging solutions**. And has been doing so since 1924.

We are a medium-sized, internationally operating group of companies with about **400 employees.** 

As a traditional **family-run business**, **quality**, **environmental protection** and the **safety** of our **customers and employees** are very important to us. Experts:

Invented: Paint adhesive masking film

Family run: 4th generation

# We educate! 25 Trainees

**FACTS:** 2,7 x LESS energy 1,6 x LESS propellant gases 17 x LESS water 2,2 Mio. LESS trees needed for the production of plastic bags compared to paper bags

Subsidiaries in Great Britain, France and Spain

Our customers: VV, BNV, Mercedes, Audi and others Worldwide: Sales to more than 60 countries

# Beeing professional means: Always a suitable solution

From the economy products manufactured from recycled materials to the unique outstanding non-slip products Horn & Bauer offers the perfect solution for all demands.

Much of the range is supplied in attractive dispenser boxes to keep the products clean and create a professional image.

Always a suitable solution.

# With the use of our products you guarantee a responsible handling of customers vehicles:

- Highest quality and service standards
- Protection of the vehicle interior against oil, liquids, dirty work clothes, dirty hands as well as dirty wheels
- Effective and low-priced
- One-time use always guarantees a new clean product
- Copious advertising space to promote a logo or corporate image
- The final cleaning of the vehicle interior will be reduced to the minimum saves time and money

# Legend for Work Shop Experts

## Non-Slip

Prevents slipping on the surface to be protected. Offers perfect and safe protection.

#### **Tear resistant**

Because of the special material composition very tough and tear resistant.

#### Antistatic

Stops static charging because of the special material components.

# Sizes from S-XXL

 For suitable seat protection for conventional car seats to large truck seats.

#### Reusable

Material characteristics permit the multiple use of the product.

#### In the dispenser box

Perfect protection against dust from the first to the last piece. Individual removal through the prepunched removal slot. No dust attraction, a clean garage wall is guaranteed. Save transport, easy storage, stackable.

# Form welded

Fits perfect to the contours of the seat. Complete covering of the seat, the backrest and the outside of the seat. Narrow head rest area allows a good rear view.

# **Personalised print**

Copious advertising space to promote a logo or corporate image. Your customers will keep you in mind.

#### **Extra strong**

Tough and tear resistant. Multiple use and suitable for long-term repairs.

# For your Work Shop.

# Being professional means: **Always the right solution at hand!**Our range of masking films protection-, special films ar

Our range of masking films as well as other protection-, special films and accessories meet the needs and requirements of collision repair in work- and paint shops.

We offer solutions from premium brands like WONDERMASK<sup>®</sup> \*\*\*\*LitePlus – in 1988 which was the revolution of masking technology: The first paint adhesive film – WONDERMASK<sup>®</sup> \*\*\*AquaFit, WONDERMASK<sup>®</sup> WPS up to simple eco-line products or other films for the protection of glasses, lights, spray booth walls, mixing rooms, mixing tables, floors or gun cleaning machines.

# Legend for Body- and Paint Shop Professionals

# 6M Technique

One product for all types of vehicles. Large vehicles like transporters, SUVs and others can be covered from front to back with the "6M technique" and cars can be covered from side to side.

#### Easy to Cut

Very good cutting ability.

Tape Resistant Tape can be repositioned.

# Water Resistant – No Marks

No marks when used on damp vehicles, no bleed-through of paint and water.

## Static

All parts of the vehicle are protected to avoid paint mist, because the film clings to the vehicle.

#### Resilient

Extremly strong. Very tear resistant during the masking process.

# Covering: Avoid unnecessary work during paint preparation

During painting not only the performance but also the preparation is important. The masking of vehicles or parts must be easy.

Before masking, the first question arises which material would be the best to apply.

Without a doubt, masking films are definetely one step ahead.

Since the introduction of our paint absorbent **masking film**, **Wondermask**<sup>®</sup> Classic during the Automechanica in Frankfurt 1988, this innovative masking technique has been implemented worldwide.

The features on the occasion of this special film guarantee **to save time and money during the process of covering vehicles**. The sizes 4, 5 and 6 meter completely cover the vehicles.

The use of smaller films or paper is not only time consuming but also expensive.

In comparisson to paper, which is offered in smaller width, the application of masking film is a single application process no extras required.

Masking films are **lint-free** and in contrast to paper do not contain fibres. Therefore, **no additional dust formation** can develop. Soaking of the film is not possible.

# The 6M Technique!

Transporters and bigger vehicles can be covered in driving direction from front to back due to the width of 6 meters. Cars can be covered from side to side (door to door) with the width of 6 meters. **One masking film width for all vehicles.** 

Your advantage: Saves time, storage and money!

**WONDERMASK®** \*\*\*\*\*LitePlus is available in widths from 25 cm to 600 cm.

## **No Water Stains**

Water stains are common, caused by residual moisture.

With the use of Horn & Bauer **WONDERMASK®** \*\*\*\*\*LitePlus and AQUAFIT the staining risks are minimised.

#### **Correction of Tape**

Most of the time when using standard films the tape can not be repositioned and the film will be damaged. The material characteristics of **WONDERMASK®** \*\*\*\*\*LitePlus films allow that the tape can be easily removed and corrected without a damage on the masking film.

125°C

110°C

## **Cutting Ability and Static**

A very good cutting and static ability will improve the productivity to make the working steps faster and provide the basis for a save and professional masking to improve the qualitiy. WONDERMASK<sup>®</sup> \*\*\*\*\*LitePlus meets all these expectations.

# **Use of infrared Drying on Masking Films**

Masking films must have a high heat resistancy when using infrared dryers. WONDERMASK<sup>®</sup> \*\*\*\*\*LitePlus is heat resistant up to 125°C so that there is no problem with the use of infrared dryers.

## **Bad Experiences with Paint Mist?**

Sometimes it happens that when painting in the lower part of the vehicle, parts of the **paint mist** crawl under the car. If the paint film hangs down to the floor, the paint mist cannot escape to the outside. It rises under the film and settles on the top of the car.

You can **prevent this** by pulling the film 20-30 cm from the ground so that it is flush with the lower edge on the opposite side.

★ Improved formulation
★ Optimised cutting behaviour
★ Better haptics

#### **Masking Protection with**

**WONDERMASK®** 

\*\*\*\*LitePlus

#### Water Resistant – No Marks

• No staining from residual moisture at the vehicle

#### 6M Side to Side / Front to Back

- One product for all types of vehicles
- Large vehicles like transporters, SUVs and others can be covered from the front to the back with the "6M technique" and all cars can be covered side to side.

#### Easy to cut

• Very good cutting ability

#### Tape resistant

• Tape is easy to remove and easy to correct

#### Further advantages

- No bleed-through of water or paint
- Heat resistant up to 125° C
- Also suitable for foiled vehicles
